Business Continuity Policy

The Company disciplines itself in order to ensure the business continuity by taking into account the national and international standards, practices and legal regulations. The Company adopts all stages of the sustainable service as a business manner.

- The risks that may arise in all business activities within the scope of the Business Continuity Management System are determined, the risk analyses are carried out and the necessary arrangements are made and the necessary measures are taken.
- The necessary infrastructure is prepared in order to ensure continuity by being affected at minimum level or not being affected at all from the circumstances that may occur out of control in the business activities.
- The crisis and emergency management is centrally coordinated.
- Planning, training, testing and drills are conducted for ensuring the business continuity. The data obtained is reported.
- Priority is given to the health and safety of the employees, and the business activities will not be commenced without making the conditions of the working environment healthy and safe in the case of any potential incident.
- The determination of the share of the innovative activities within our production processes in the total income and the observation of the continuity of the activities form the basis of our innovation activities.
