### Primary Environmental Policy

Respect for the environment is included among the corporate values. We plan all of our processes by assessing the relevant activity on the environment and take the necessary measures.

The environmental priorities of the Company include the following:

- That the entire value chain adopts respect for the environment and informs the suppliers by making the necessary arrangements
- To implement an environmental assessment system that allows for mitigating the environmental risks, managing the resources and ensuring their efficiency, and reducing the investment costs
- To determine and periodically update the environment-related strategic priorities and issues
- To train the employees and suppliers
- To set verifiable and realistic environmental targets
- To adhere to the international and national environmental standards and to take part in the initiatives
- To comply with the environmental laws and regulations in the countries where the operations are carried out
- To establish an accountable balance of production and consumption
- To meet the need for power that will contribute to a sustainable and accountable environment, to create value through new technologies and innovative and eco-efficient practices
- To identify, continuously and regularly monitor, measure and report the environmental risks within the project development processes
- To mitigate the risks and to minimize or eliminate the adverse environmental effects
- To make arrangements and to take measures for the conservation of water, air, soil and biodiversity, the efficient and cost-effective use of the power, the mitigation of emissions, the management of wastes and residuals, resource efficiency, and chemical waste management
- To support the environmental policy with sub-policies in relation to water, air, soil, biodiversity, energy efficiency, emissions, wastes and residuals, resource efficiency, and chemical wastes
- To provide support to the public works related to the environment in the regions where the Company operates
