Primary Climate Policy

A corporate culture that creates solutions for the climate variability within all business processes of the Company and that focuses on raising awareness is generated and maintained.

Within this scope, the Company;

- is determined to create realistic solutions in line with the policies regarding all issues within the scope of climate variability in order to proactively contribute to a sustainable future; and
- carries out activities for raising the awareness of all stakeholders, mainly the employees and suppliers, about the climate variability.
- It is essential that the goals set and actions determined comply with the international standards on climate variability and are supportive.
